## WORK EXPERIENCE

---

### Charter Flight Group

Software Engineer II

Mar 2024 - Present

Remote

- Led the development of jetagency.com, utilizing React, TypeScript, Next.js, and Strapi to enhance the user experience for exclusive company members.
- Spearheaded the creation of the company's membership CRM, leveraging React, TypeScript, Next.js, and FastAPI to build data-driven, highly interactive pages with advanced visualizations optimizing membership management and client service operations.
- Led the front-end development of the Outbound Sales CRM, utilizing React, TypeScript, Next.js, and Flask to create interactive tables, implement advanced search and filtering, and integrate sales actions resulting in a 30% increase in sales over subsequent months.
- Collaborated closely with design and marketing teams to develop accessible features that enhance the experience and usability of the company's four public website brands.

### Full Stack Web Developer

Freelance | Self-Employed

Jan 2022 - Mar 2024

Remote

- As a full stack web developer, I design and build responsive, user-focused web applications using modern technologies. I work closely with clients to understand their business needs and translate them into efficient, scalable digital solutions.
- My experience spans both front-end and back-end development, from crafting clean, accessible interfaces to implementing secure authentication, API integrations, and database management. I take pride in writing maintainable, high-quality code and ensuring that every project I deliver meets performance, security, and usability standards.

**Artec Manufacturing****Feb 2013 - Jan 2023**

Systems &amp; Network Administrator

On-Site

- Optimized organizational efficiency by implementing robust networking solutions and delivering expert IT support.
- Safeguarded critical business operations by managing data backups, ensuring system reliability, and maintaining business continuity.
